## Plan to Plant Now

We Have the Plants and Equipment  
to Furnish You with the Best of

### Quality, Service and Price

#### Coniferous Evergreens

The greatest advantage of using Evergreens in beautifying the home grounds is that Evergreens retain their foliage the year around. By planting the proper varieties in their proper places wonderful results can be obtained with but little expense. It is necessary, however, to plant Evergreens where they will get ample sunlight that they may show their true colors. If you are not familiar with the planting of Evergreens and wish to plant at this time it will be a pleasure for us to furnish you with such information you may wish to help you get the desired results.

3 to 4 feet.....	Each \$7.50
4 to 5 feet.....	Each \$10.00

### IMPORTANT

Prune evergreens when they are growing—better just as the spring growth comes on and at least before it becomes hard in July. The principal trouble is the dog. Tie up the pup, as canines and conifers don't mix, or else plant something on front row in protection.

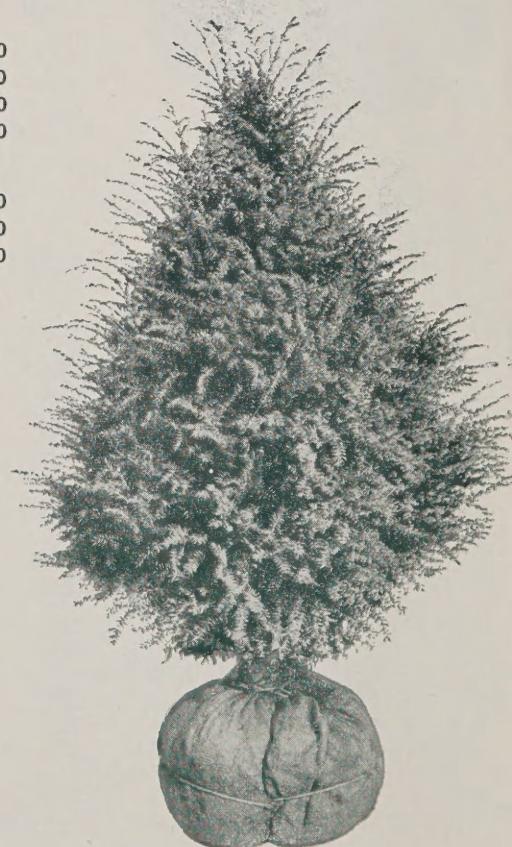

DWARF, OR MUGHO PINE

# OLD VIRGINIA BOXWOOD

## *and its Planting and Care*

**Moving Boxwood**—Boxwood is dug with a ball of earth, burlapped and wired, so that soil will not crumble and give way in handling; is wired to oak platforms to enable easier handling and to protect the ball in transit.

**When to Plant Boxwood**—Boxwood can be planted at any time so long as there is no new, tender growth on the plants, we prefer early spring or early fall planting.

**How to Plant Boxwood**—In planting boxwood the hole should be dug one foot wider than the ball of earth, place ball in hole and remove wire and burlap, fill hole half full of top soil and turn hose on until hole is half full of water, see that the wet muck is worked under and around the ball to close all air pockets, then fill hole with top soil to within three inches of the top of ball, then apply German peat moss three inches and on top of that apply bone meal, finely ground, covering peat moss to a depth of two inches, then water down, leave ground cupped around plant in saucer shape to hold water when applied. Boxwood requires some lime and we find by using bone meal the plant gets about the required amount of lime.

**Box Leaf Minor**—We have had no experience with this pest and advise you to write Virginia Department of Agriculture and Immigration, Richmond, Virginia, for bulletin.

**Red Spider**—This pest is right troublesome during hot, dry weather, the best remedy we have so far found is sulphur, we get three-hundred-screen dusting sulphur and apply with a dust gun, go all over the plants thoroughly and after dusting go over the plants with a broom and knock off all that has settled in spots, for this will cause a yellow spot to appear from burning. We use a winter spray of miscible oil on boxwood, use one part oil to thirty parts of water, Sunoco Oil we find very good. This winter spray will, many times, keep spider off during spring and summer and if it fails we apply sulphur as suggested above.

These notes are made from our past fifteen years' experience in handling boxwood, propagating annually several hundred thousand plants and collecting from old Southern homes in Virginia and North Carolina many carloads of boxwood.

We have shipped thousands of collected plants of boxwood in the past fifteen years and to this date have not had one plant reported dead, there may have been some loss that was not reported, but the loss must have been negligible or we would have had complaints.

BOXWOOD AT ENTRANCE TO OUR MAIN NURSERY

**Watering Boxwood**—Don't let your boxwood get dry—water once a week if not having weekly rains, we find it a good plan to sprinkle foliage once or twice a week in hot, dry weather. Turn hose on full force as this has a tendency to knock off red spider.

**Diseases and Treatment of Boxwood—Canker**—This is sometimes known as Nectria Canker, this can be largely controlled by the use of Bordeaux Spray, full strength, applied any nice day during winter, or you can use Wilson's Fung-O. This canker causes yellow to brown spots on the foliage and spreads down the stems to the trunk of the plant.

A FEW NINE-FOOT SPECIMENS WE ARE OFFERING THIS SEASON

### Buxus Semperfervirens (Bush Box)

## PLANTING THE GARDEN

You'll find few diversions more delightful than the simple acts of planting and caring for a garden. If you have not already, now is the time to plant those varieties that you have seen this summer on other lawns and envied for your own. If you haven't, no better time will ever come to tap the treasure-trove of beauty and the richest enjoyment that exists right at your doorstep.

We will be glad to quote  
on request.

# GARDEN WARE

A superior furniture for garden and interior decoration. White flint sand, mixed with cement, moulded into artistic shapes and properly seasoned. The result is a garden furniture of fine appearance, equal in hardness and wearing quality to natural stone. It is both weather-proof and time-proof. It keeps for a lifetime the delicate tracery as well as the sharp detail of its design. It is finished in gray to resemble granite, or in white to resemble marble and the resemblance is strikingly good. This ware has the advantage of being much less expensive than either of these stones.

# Beautiful Pergolas, Arches and Gateways to Brighten Home Surroundings

No. 11 PERGOLA

A pretty Pergola, pleasingly styled, of good size and priced surprisingly low. It is a number that will brighten any lawn or garden, yet priced within the reach of the most modest purse. Designed particularly as a support for lighter vines.

Height 75 in. Width 48 in. Depth 18 in. Shipped in easy to assemble sections.

**\$3.00**

Painted snow white.....

No. 16 PERGOLA

This charming Pergola is really an exceptional value, an outstanding example of what the Rowe line offers in the way of smart styling and fine construction at such low cost. This Pergola is bound to please—to effectively brighten any spot where it is used.

Height 75 in. Width 54 in. Depth 21 in. Packed in easily assembled sections.

Painted snow white.....

**\$5.00**

## Trellises that radiate Charm and Loveliness and Cost So Little

15 YEARS LEADERSHIP is a remarkable record. Rowe Trellises, Arches, Pergolas, etc., have proven their superiority. The large amount of reorder business from year to year is the sincere testimonial that quality and modern designing are always present in every unit. 1940 is not an exception. Only the best of clear, soft-textured materials are used. ALL SIDES ARE SMOOTHLY FINISHED—ALL CORNERS ARE NEATLY ROUNDED. All painted SNOW WHITE with a long-lived linseed oil base paint.

Many Other Designs  
Carried in Stock

No. 302

Strength in construction and attractive, well balanced design, feature this desirable, low priced Trellis. Height 8 ft. Width 30 in.

Painted  
snow white...

**\$2.00**

# OUR POLICIES AND SERVICE

READ BEFORE ORDERING

**DELIVERIES**—Our trucks make several free deliveries within 150 miles of Roanoke during planting season—get your orders in early to catch these deliveries.

**TERMS**—Unlike most types of business, the average turnover of our stock is four and a half years. In other words, we are that length of time in getting our money back even when the goods are sold on a cash basis. For this reason

our terms are cash with order, unless otherwise arranged.

## PLANTS FREE OF DISEASE

A state certificate of inspection, with planting instructions, accompanies each shipment, assuring its freedom from insect pests and disease. We are members of the American Association of Nurserymen and the Virginia Association of Nurserymen.

We carry a complete line of insecticides, fertilizers, porch boxes, garden tools, etc.

## THE HEDGE LAWN NURSERY

agrees to resupply, F. O. B. their Nursery, at one-half the original price paid for any plants sold within published prices that may die within one year from date of invoice from any causes other than abuse or neglect. Two reservations are made: 1—That cash accompany this order. 2—That in event we shall not have in stock at the time, for replacement, plants like those originally supplied, or are prevented by strikes, quarantine, or other conditions beyond our control, from making shipments of plants needed for replacement, then we are to apply the amount of credit to which the customer is entitled toward the purchase of other plants that he may at the time select and which we can supply.

# HEDGE LAWN NURSERIES, INC.
